 As the match begins, check every minute for changes in odds (probabilities) off

ered by sportsbooks.
 If within the first hour, there is a significant change in sportsbook odds that

 imply that your prediction is wrong, bet your original prediction at the new, b

etter price.
 Our algorithm estimates that the Red Sox will win with a 70% probability.
 This means that we must bet $250 to make a $100 profit.
We use a 1-hour limit because in a 3-hour MLB game, if our team starts losing 2

and a half hours into the game, then they'll probably lose as there isn'

t much time for a comeback.
Let's visualize what this mid-game change in odds might look like:
 Sports Betting Dime has been helping fans and bettors navigate challenges and f

ind success for years, with all the critical information they need to bet confid
