You can use the One-time card at the store's checkout, like any regular credit card. Each One-time card will follow a specific payment plan, which you can manage and pay in the app.

Please be aware that an authorization hold might be placed on your payment card, depending on the payment option you choose when creating the card. This ensures that enough funds are available on your credit or debit card.

Shop with us in the Klarna app

Set the spending amount

Check out on the store's site

Pay with your One-time card

If you end up spending less than the amount on your One-time card, you can change the spending amount by selecting Refund unused amount on the purchase page. Otherwise, the amount will automatically be adjusted after 14 days.

When you create a One-time card it's connected to your personal debit or credit card, depending on the payment option you chose. Your first payment is debited 24 hours after the card is created and the following payments are automatically withdrawn according to the payment plan. You can view your payment plan, pay early and change your connected debit or credit card at any time in the app.
